

## **Thanks for downloading Samsara Room on your Mac!**

You will need the latest Flash Player to run the game: <https://get.adobe.com/flashplayer/>  
Unzip the file and double click on the .app to run the game. If it says that game is broken and .app couldn't open. Please go to your Gatekeeper settings.

You can find Gatekeeper settings in System Preferences > Security & Privacy > General.  
By default Gatekeeper will only open apps purchased and downloaded from the Mac App Store or from a list of identified and trusted developers that have been given the ok from Apple by obtaining an unique Developer ID. To install other apps, select the option to install from Anywhere (preview of this screen: [http://its.uiowa.edu/files/its.uiowa.edu/files/anywhere\\_0.png](http://its.uiowa.edu/files/its.uiowa.edu/files/anywhere_0.png)). Note: In most cases, Gatekeeper may only need to be disabled temporarily in order to install and initially launch an application. After that, Gatekeeper can be re-enabled to only allow applications from the Mac App Store and identified developers.

**For Sierra users we recommend to use the tips and tricks explained here:** <https://www.tekrevue.com/tip/gatekeeper-macos-sierra/>

**For Catalina/Mojave users, use the following workaround:**  
<https://www.imore.com/how-open-apps-anywhere-macos-catalina-and-mojave>

**Contact us at [info@rustylake.com](mailto:info@rustylake.com), if you can not make it work. We will provide a Steam key to run the game.**

Settings:

- Are encountering a glitch or game breaking bug? Try to reset (Settings -> Reset)
- Is the game running slow? Change the graphics to low/medium/high.
- Choose you language with the world icon
- Turn off/on Music and Sound
- Make sure to make copies of your save game in Documents -> Rusty Lake -> SamsaraRoom -> SaveGame.sav, when you update the game.

Please send us an email via [info@rustylake.com](mailto:info@rustylake.com) if any bug/issue occurs and we will try to find a solution as soon as possible. We want to keep everyone happy, when launching a premium game!

We will unfold the Rusty Lake story one step at a time. So check RustyLake.com every day for new content and follow us on:
