INSTALLATION & REGISTRATION GUIDE

··· x l n a u d i o ···

The purpose of the XLN Online Installer is to help you download, install and authorize your XLN Audio products and keep them up to date.
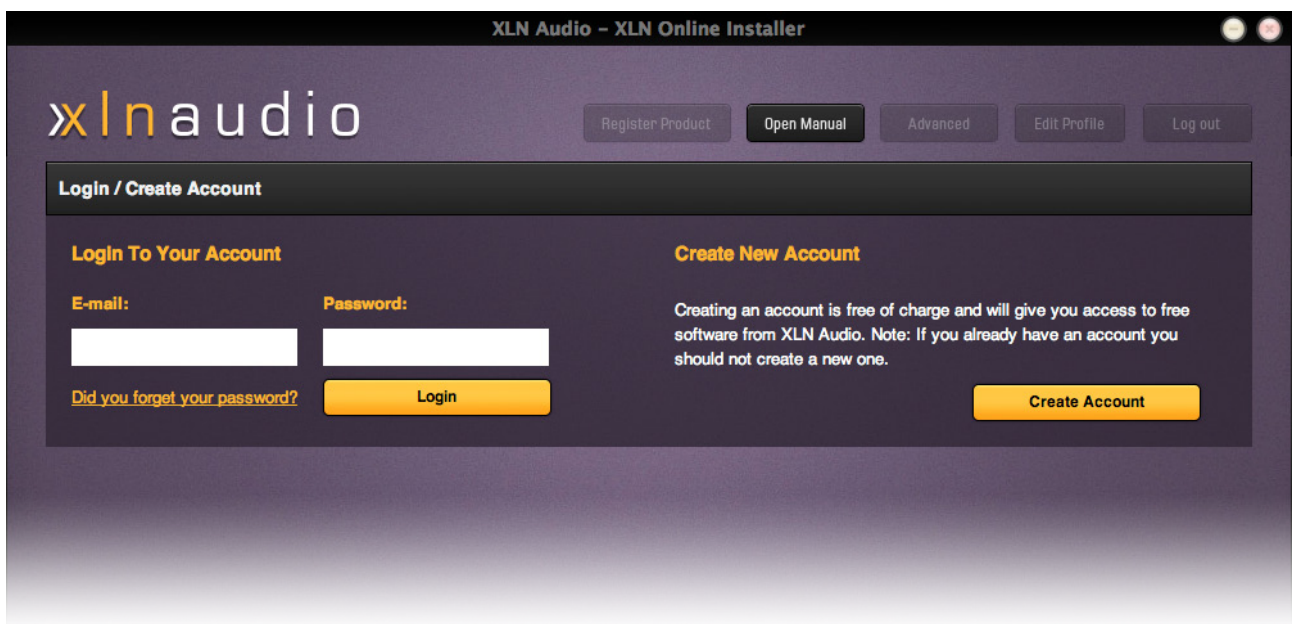

1. DOWNLOAD THE XLN ONLINE INSTALLER

Download the XLN Online Installer from this link: www.xlnaudio.com/install

Note: If you already have the Online Installer you will find it in the XLN Audio folder located in the Applications folder on Mac or in the Start menu on PC. Go to step 02.

2. XLN AUDIO ACCOUNT

Run the XLN Online Installer and login to your XLN Audio Account. If you do not have an XLN Audio Account, press [CREATE ACCOUNT] to create a new account.

3. REGISTER COMPUTER

In order to authorize your product(s) you will need to add your computer(s) to your account. According to the license agreement you're allowed to have any XLN Audio product installed and authorized on two computers at the same time.

Note: If you have previously added your computer in your user account (either on the website or in the Online Installer), you will automatically be redirected to the next step.

Please fill in the required information and press [ADD COMPUTER].

4. REGISTER PRODUCT

The product registration screen will automatically show up if you do not own any XLN Audio products.

By clicking the [REGISTER PRODUCT] button in the top menu you can access the register product page at any time.

Enter a Product Key to register your product or add one of the free products to your account.

5. ONLINE INSTALLER MAIN PAGE

On the left side of the Online Installer main page is a list of all products available on your XLN Audio Account. It shows a checkbox, the product name and the status of the product. The status shows if the product is installed or not, up to date or if it needs an update. The large yellow ["ACTION"] button in the bottom sums up the status of all products and actions to be done. An example could be "INSTALL: 1 UPDATE: 2" and by pressing the button the Online Installer executes the actions chosen to be done.

NOTE: If you want to change the installation paths for the sound data or move an existing installation, simply press the [ADVANCED] button and follow the on-screen instructions.

6. UNINSTALL PRODUCT

To uninstall a product, simply uncheck the product check box in the product list and the status will change to "Uninstall" and the ["ACTION"] button will add the action "UNINSTALL: 1". By clicking the red button in the status field or the ["ACTION"] button the unchecked product will be uninstalled.
